-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-58 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite the inclusion of an EPDM rubber that “has a Mooney Viscosity of at least 100 MU”. To quote the instant Specification at page 7, lines 4-5, “Mooney Unit values will differ based upon different temperatures used for conducting the measurement.” The claim does not recite any particular ASTM test or conditions for the measurement, but recites values for the Mooney Viscosity as though they were absolute fixed numbers. Recitation of bare numbers (or vague or changeable units) is not proper since the metes and bounds of the recitation are not easily discernible. As such, the instant claims are deemed to be vague and confusing.

The references to Puydak et al ('081) and ('597) and Kuan et al, cited by applicants, and Abdou-Sabet et al, cited herein, all applied in the parent PCT application are retained of interest. Neither reference teaches a Mooney Viscosity for the EPDM copolymer as high as those employed herein. Each reference teaches a lower viscosity, with measurements being made at a lower temperature. The Mooney Viscosity measured at a higher temperature for the same identical polymer would be expected to

decrease, and not increase. Neither document is deemed to present a bar to the patentability of the instant claims. Note the disclosure of each document.
